

Bar Moshe

AI Builder & Full-Stack Engineer. I ship AI and agentic products from idea to production: LLM apps, MCP tooling, and the full-stack systems around them.

Experience

- **Software Developer, Joomsy** — 05/2025 to Present. Primary developer at a five-person startup; own full-stack delivery and DevOps end to end, across engineering and product.
- **Customer Support Engineer, Wochit** — 10/2021 to Present. Frontline engineering support for a cloud video editor at scale; resolve issues and turn user feedback into product improvements with the dev team.

Projects

- **MIDI GPT REST API** — A REST API merging creativity and engineering. Temporal SDK, Python, Go, TypeScript, Express, OpenAI.
- **Israelify** — Full-stack Spotify-style app; React and Node.js with streaming, auth, and personalized playlists.
- **Cross-language Temporal service** — One workflow orchestrating Go, Python, and TypeScript workers across task queues. Featured on Temporal's Code Exchange.

Skills

- **AI** — LLM apps, MCP servers, Claude Code and Codex plugins, prompt engineering, agents and evals
- **Web** — React, Next.js, Node.js, REST APIs
- **DevOps** — AWS, Docker, Kubernetes, Terraform, CI/CD
- **Languages** — TypeScript, JavaScript, Python, Go, C#. I've worked with a wide range of languages and enjoy learning new ones to stay adaptable and up-to-date.

Education

- **B.Sc. Computer Science, Afeka College of Engineering** — 2020 to 2023.
- **DevOps Workshop, Wix Tel Aviv** — EKS, Kubernetes, Terraform, microservices.
- **FullStack Bootcamp, Coding Academy** — Node.js, React, MongoDB.
